

# ENGINEERING

INNOVATION TO IMPLEMENTATION

## Our Core Capabilities and Expertise

1. Robotics and end of arm tool design
2. Part feeding solutions
  - a. Conveyors
  - b. Rotary dials
  - c. Tote/Bin Feeding
  - d. Vision based tools
  - e. Large part fixturing/slides
3. User interface design and optimization.  
Can mirror partner systems or provide a simplified interface for operators
4. Part fixturing and tooling design
5. Safety systems design and validation

## How It Works

We become an extension of your team. We look at the opportunities, develop concepts, attend reviews with the customers and help deliver a unified proposal that is beneficial to all parties. We work to customize our cells to the unique aspects of your machine. Leading to efficient designs, systems that exceed your customer's expectations and streamlining the proposal process.

## Your Automation Partner

Automation is key to helping US manufacturers compete in a global market.  
Let us help you compete as your automation partner.

### Reasons to Partner with i2i

1. Keep internal team focused on core competencies
2. Provide full solutions without accepting additional risk
3. Reduced burden in the proposal phase with turnkey solutions developed and delivered by i2i at no cost
4. Expand to customers who require automated machine tending for RFQ submittal
5. Increase revenue without adding expense and liabilities
